

Abstract template June 26th-28th, 2018

Title

Authors (presenting author should be underlined)
Institution or company, Address and country
Corresponding e-mail address
Phone number

Summary

Please describe briefly the highlights of your work here. The summary must not exceed 200 words. This summary will appear in the abstract booklet of the conference. It should give a short and concise overview on your contribution to attract attention. Please highlight (**bold** and *italic*) up to 5 significant keywords in this summary. Please, do not use symbols in the title and the summary. Figures cannot be reproduced in the abstract booklet of the conference.

Topic

If applicable, please attribute your work to an appropriate topic shown in the following list. To introduce a new topic please give a short background motivation and refer to selected relevant literature. Take care that your contribution is in line with the suggested topic. Choose an adequate title that reveals the aim of your work.

Data Acquisition & Sensors
Data Management Technology
& Solutions – Big Data!
Networks & Transport Protocols –
Internet of Things
Security of links and networks:
jamming, anti-jamming, spoofing
Distributed Operations – a telemetry
Cloud?
Remote Site Automation

Range Safety Systems
Ground Systems Architectures
Spectrum Efficient Technologies &
Applications
RF Design, Receivers & Antennas
Modulation & Coding
Imaging & Video
Optical transmission
Time-Space position technologies
Other Aspects of Telemetry

Abstract & manuscript submission

Papers will be judged based on their scientific and technical content, relevance to the scope of the conference and originality.

Please note that the conference enforces the “no paper, no podium” rule.

Send your filled abstract template to the following email address:

papers@ettc2018.org

Deadline for abstract submission:
Acceptance notification:
(will be sent to the corresponding email address)
Delivery of final manuscript:

January 26th, 2018

March 12th, 2018

May 4th, 2018
